### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5, 8-14, and 17-20 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Hawley.

See especially Figures 4-9 and column 5, lines 37-39.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 6, 7, 15, and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hawley in view of Ash et al.

Hawley discloses an a method of manufacturing a blended wing aircraft and family of aircraft comprising providing a centerbody cabin comprised of a plurality of body modules of different size which are disposed in pairs laterally on each side of a center line of the cabin and where the modules can be disposed to construct different aircraft of the family. See especially Figures 4-9 and column 5, lines 37-39. Hawley fails to show an aft center body cabin that is coupled to the center body cabin. Ash et al teach, see especially Figure 1, that it is known to provide longitudinally separated modules, in addition to laterally separated modules, to form an aft portion of an aircraft center body. Motivation to combine is the clear advantages of greater flexibility of construction and

Art Unit: 3644

the ability to increase the length of the aircraft without having to construct increased length lateral modules.
